Ownership, Proactive, Self-motivation

### Presentations & Documentation

Creates engaging demos, tutorials, and technical content

Demo, Screencast, Tutorial, User guides

## Languages

### Russian

Native

### English

C1

I have 15 years of experience in IT, launching 25+ products (B2B, B2C, SaaS, Desktop/Web/Mobile apps) in BI, AI, HealthTech/MedTech, TrafficTech, Reporting, and E-commerce. I handle discovery and delivery—acting as both product and project manager—coordinating multiple teams, stakeholders, and departments. Led and managed custom software development teams, product teams (up to 30 members), startups, and coordinated with outstaffing resources. Guided the journey from 0 to 1, taking products from concept to launch.

## Experience

**RETABLE**

01.2023 – 12.2024

SENIOR PRODUCT MANAGER

USA

<https://www.tabula.io>

A product startup with on-prem, B2C solutions for data analysts and RevOps. An innovative visual approach to building ETL data transformation pipelines powered by AI. Stack: Java, PostgreSQL, Kotlin, React, Electron.

**ALUNA HEALTH**

01.2017 – 12.2022

HEAD OF PRODUCT

USA

<https://www.alunahealth.com>

A Boston-based HealthTech company with a 15-person cross-functional team, creating both SaaS and on-prem B2B solutions for hospitals and pharma, plus a B2C iOS app promoting healthy habits (notifications, activity tracking, HealthKit integration). Stack: Objective-C, Java, Angular, InterSystems IRIS, Apache cTAKES.

**BIARUM**

01.2012 – 12.2022

PROJECT MANAGER

Russia

<https://www.biarum.com>

Outsourcing company with 30+ employees divided into small project teams. My responsibility was to facilitate development for most products for various US-based clients.

**TICON**

01.2017 – 01.2019

PROJECT MANAGER

USA

<https://www.ticon.co>

A product company (B2B) providing traffic flow reports for targeted intersections, junctions, or highways to businesses interested in placing billboard advertisements or constructing new facilities. Led the development of the internal portal for analysts and sales teams, powered by patent-pending calculation algorithms. Stack: Java, Angular, Here Maps, OSM.

**PDFFILLER**

01.2015 – 12.2016

PROJECT MANAGER

USA

<https://www.pdffiller.com>

A major SaaS product for working with PDF documents, among the leaders in its field. I managed the development team that rework the document and form editor in JavaScript (previously based on Flash technology).

**IMPROVE LABS**

01.2012 – 12.2015

PROJECT MANAGER

USA

<https://www.improvelabs.com>

A product company in HealthTech/MedTech, which was acquired—along with its main product, Family History Tool—by Invitae. Stack: PHP, Objective-C, NodeJS, R.

**GO2SEE**

01.2010 – 12.2012

PROJECT MANAGER

Russia

<https://mego.travel>

Development and launch of a portal for online booking of air and train tickets. Stack: .NET, Angular.

## Education

**SPbGIK**

2008

Informatics and Analytics

## References

**Anastasia**

Tabula co-founder

<https://www.tabula.io>

Recommendation for a top-tier product manager/ head of product.

Roman is an exceptional CPO with a background in software dev, AI, big data, and NLP projects.

As a truly professional product manager, Roman has the ability to wear multiple hats—acting as a programmer, database analyst, UX engineer, designer, software tester, and end-user advocate.
